

## AI Use Declaration Form — 2026

### Purpose of This Form

This declaration form must be submitted alongside every assessed piece of work. Its purpose is to promote academic integrity and transparency regarding the use of Artificial Intelligence (AI) tools. Honest completion is mandatory.

### Student Details

| Student Full Name | Student ID / Number | Course   |
|-------------------|---------------------|----------|
| Chai Europa       | ERPTEA001           | INF3014F |

### Declaration of AI Use

*Please tick ONE of the options below by marking the appropriate box:*

☐

**Option A** – I did NOT use any AI tools in completing this assignment.

By selecting Option A, you confirm that all submitted work is entirely your own and that no AI-generated text, images, code or other content has been incorporated.

☒

**Option B** – I DID use one or more AI tools. (Complete Section 3 below.)

By selecting Option B, you agree to provide full details in the section below. Failure to disclose AI use when it occurred may constitute academic misconduct.

### AI Tool Details

| AI Tool / Platform                              | Prompt(s) Used                                                                                               | How You Used the Output                                                                 |
|-------------------------------------------------|--------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------|
| <i>e.g. ChatGPT, Claude, Copilot, Gemini...</i> | <i>Copy or paraphrase the main prompts you entered into the AI tool:</i>                                     | <i>Explain how you modified, verified, or integrated the AI output into your work:</i>  |
| Claude AI                                       | “ive made my products smaller than half the screen however they wont wrap after one another”                 | Added border-box sizing (later used this same fix for almost all containers)            |
| Claude AI                                       | “my tables cannot fit in the wishlist and cart sections, text always runs over and overlaps with each other” | Hid image and availability columns in tables and wrapped product name text (for mobile) |
| Claude AI                                       | “the footer has too many columns to fit cleanly on mobile. how can i make                                    | Separated the links sections in footer into two columns instead for mobile              |

|           |                                                                                                                                      |                                                          |
|-----------|--------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------|
|           | sure everything in the footer is still visible while adjusting to mobile phone size"                                                 |                                                          |
| Claude AI | "i've created a 480px version and 768px version of my website, but now the version on my phone looks odd (was fine with just 480px)" | Reordered my code from biggest device to smallest device |

|                                                                                                               |                                            |
